# INVOIC Invoice message

## Message Status=2

**Definition:** A message claiming payment for goods or services supplied under conditions agreed between the seller and the buyer. The United Nations Standard Invoice Message, with correct data qualification, serves also as the specification for Debit Note and Credit Note messages. Throughout this document, the reference to 'Invoice' may be interpreted as conveying the wider meaning of 'Invoice/Credit Note/Debit Note'.

### Cummins Note:

Cummins processes invoices at Cummins Business Services (CBS) regional locations, depending on where the Cummins plant is located. You can find the appropriate CBS region by referring to the bill-to address on each Purchase Order.

At this time only certain Cummins Accounts Payable (AP) regions accept EDI invoices, but more regions are being added.

## How to send a correct INVOIC to Cummins Accounts Payable

1. Make sure you are approved to submit INVOICs to the Accounts Payable region you are billing. Each CBS AP region tests for EDI invoicing separately, and so you must receive separate approval for each region. Once you are approved for a region, you are then approved for all Cummins plants that bill to that region. INVOIC testing is handled separately from DELFOR/DESADV testing. Contact [Electronic.Commerce.Support@cummins.com](mailto:Electronic.Commerce.Support@cummins.com) to get information about the INVOIC testing and approval process.

2. Send your INVOIC to the correct AP region.

This list is complete as of the date this document was published. For the current list refer to <https://public.cummins.com/sites/CSP/en-us/Pages/EDI-Implementation-Information.aspx>.

CBS AP Region	Receiver ID:Qualifier
CBS Australia (CBSA)	940777858:1
CBS Belgium (CBSB)	372051318:1
CBS China (CBSC)	654698141:1
CBS Ghana (CBSAG)	850458834:1
CBS Mexico (CBSM)	932707235:1
CBS Singapore (CBSS)	595127986:1
CBS South Africa (CBSSA)	635214682:1
CBS UK (CBSE)	217480354:1
CBS US (CBSN)	006415160:1
<b>JVO US - Cummins JV Kitting</b>	<b>080703816:1</b>
<b>JVO UK - Cummins JV Kitting</b>	<b>222655112:1</b>

3. Use a unique invoice number.

Invoice numbers must be unique for every invoice per CBS AP region and are assigned by the supplier.

Duplicate invoice numbers received from the same supplier are rejected in order to avoid accidental duplication of payments.

4. Verify that your INVOIC matches your physical shipments.

Any discrepancy will cause reconciliation issues and potential payment delay for the supplier.

5. Match the information provided in the Purchase Order.

INVOIC information must agree with the information contained in the corresponding DELFOR, DELJIT, or ORDERS message. Use the same PO numbers, part numbers, etc. Any discrepancy will cause reconciliation issues and potential payment delay for the supplier. If you do not receive a DELFOR, DELJIT, or ORDERS message for a particular plant, match the information on the Purchase Order.

6. Submission of invoices for blanket vs standard purchase orders.

For blanket purchase orders, the PO number should be sent only at the header level. For standard purchase orders, the PO number should only be sent at the line level. Further information is provided in this Implementation Guide (IG).

7. List your line items correctly.

Each part number should be listed only one time in the INVOIC. Additional charges such as freight, taxes, etc. should each be listed separately, using the proper segments as described later in this IG.

8. Respond immediately to error messages.

If you receive any error notice, it means your INVOIC did not get processed for payment. Error notices will be sent in one of two formats:

a) If there are technical issues with the format of your INVOIC, you may receive an error report from Cummins Electronic Commerce Support via email. Correct your errors and resubmit the INVOIC with the same invoice number.

b) If your INVOIC has no technical issues but has data issues, the Cummins CBS AP region may send an APERAK (Application Error Acknowledgement message) via EDI in response which will include information about the error that occurred. Contact the CBS AP region for more information about how to resolve the error. You can find the contact information of the CBS AP group for that respective region at [supplier.cummins.com](http://supplier.cummins.com) under the Supplier Payments section.

## Cummins Note:

1) The NAD+SF segment is required in order to identify the Ship-From party.

For the Ship-From segment (SF), use the supplier identification number provided to you in the DELFOR, DELJIT, or ORDERS message in the NAD020-010 Party ID element in the NAD+SU segment. This value may be different for every Cummins plant that you ship to. If you do not receive a DELFOR, DELJIT, or ORDERS message for a particular plant, you should use the sender/receiver ID for the Ship-From party.

2) The NAD+ST segment is required in order to identify the Ship-To party.

For the Ship-To segment (ST), use the Cummins defined plant identification number provided to you in the DELFOR, DELJIT, or ORDERS message in the NAD020-010 Party ID element in the NAD+ST segment. This value will be different for every Cummins plant that you ship to. If you do not receive a DELFOR, DELJIT, or ORDERS message for a particular plant, you can go to our website below to get a list of the required values.
